Garden machinery is only as good as the support that comes with it, which is why we have a fully trained customer care team to assist our Mitox® dealers with all queries they may have on Mitox machinery.

Mitox® products are available from your local approved garden machinery specialists, chosen for their expert knowledge and service skills. You can find your local Mitox® approved dealer by visiting www.mitox.co.uk.

In addition to testing in a controlled environment, every new Mitox® model is tested for performance and durability by professional users before launch, ensuring dependability in the harshest conditions.

ABOUT US

Mitox® was introduced into the UK in 2005 and has since become one of the fastest growing and trusted garden machinery brands, earning popularity with homeowners and landowners who recognise the outstanding quality and value for money that Mitox® products deliver.

Mitox® products are available throughout the UK and Ireland via a network of over 300 approved specialist dealers. Mitox® approved dealers have the knowledge and experience to help you choose the correct product for your needs, and will also provide expert after-sales assistance when your machinery requires servicing. Mitox® dealers are supported by a comprehensive, industry leading spare parts service with all spare parts typically delivered within 24 hours.

The Mitox® range of garden machinery continues to evolve and now includes a quality selection of grass trimmers, brushcutters, hedge trimmers, long reach hedge trimmers, multi-tools, pole pruners, chainsaws, wood splitters, blower vacs and much more.

All Mitox® products benefit from the latest technology in their design and manufacture, providing excellent ergonomics, outstanding performance and efficiency. Engineered for durability, all Mitox® products feature a comprehensive homeowner warranty as standard.

At Mitox® we aim to exceed our customers' expectations in providing reliable, value for money, powerful products, which continue to earn the Mitox® brand its excellent reputation.

“MITOX® was built upon a set of core values.
MITOX® offers unrivalled value for money,
excellent performance and full aftersales
support.”

MITOX[®]

SELECT

Mitox[®] SELECT provides a range of entry-level garden machines at great value for money. Durable and reliable, Mitox[®] SELECT machines are supplied with a 3 year* warranty and unlike many entry-level garden tools, have full spare parts support.

*Subject to annual service

(SP models feature a 1 year warranty)

MITOX[®]

PREMIUM

Mitox[®] PREMIUM provides a range of quality garden machines with extra features for more demanding users. With lower vibration levels, improved ergonomics and helpful features, such as easy start systems, PREMIUM machines are for users demanding more and feature a 5 year* domestic warranty.

*Subject to annual service

CHOOSING THE RIGHT MACHINE FOR THE TASK AT HAND...

From a small selection of handheld garden equipment the Mitox[®] range has, over the last 10 years, developed into a comprehensive collection of quality, durable and excellent value for money garden machinery.

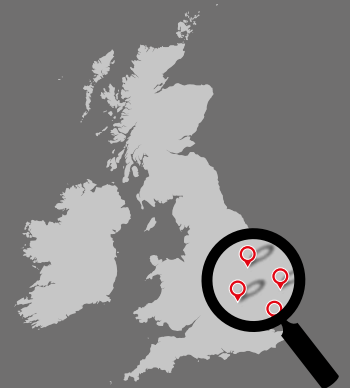

The Mitox[®] range is divided into two distinct series: SELECT and PREMIUM to assist you in choosing the right machine for your requirements.

Whether you are an occasional user looking for a quality, reliable tool for infrequent jobs around the garden or a landowner who needs something for more demanding tasks, the Mitox[®] range is designed to offer a solution for every requirement.

Advanced technologies and innovations featured on Mitox[®] products, retains the core values that the initial Mitox[®] range was founded: Quality, Performance and Value.

SP SELECT GRASS TRIMMER & BRUSHCUTTER SERIES

FULL CRANK ENGINES

Providing superior performance, lower vibration and longer service life, when compared to half crank (single bearing) engines, commonly used on low cost domestic garden machinery.

EASY STORAGE

Both models feature a split shaft design with a robust aluminium coupling for easy storage and transportation.

BUMP FEED HEAD

The auto bump feed nylon head supplies more trimmer line when it is required - simply tap the head on the ground when it is spinning to release more line.

SIMPLE STARTING

The MITOX® engine features a primer bulb and choke for a simple starting procedure. Simply press the primer 7 times, turn the choke on and pull the recoil. Once the engine fires, turn off the choke and pull the recoil again to start the engine.

LOOP HANDLE

The 25C-SP and 26L-SP feature a loop handle for ease of use in trimming or edging positions. The 26L-SP also features a 'J' bar to protect the user when the 3 tooth blade is fitted.

ERGONOMIC CONTROLS

The handles are designed for comfort, even over extended working periods. The solid triggers reduce the risk of damage, ensuring a long working life.

25C-SP SELECT

Art No: MIBC100

Simple grass trimmer for the domestic gardener

The 25C-SP is a quality grass trimmer powered by a 25.4cc engine. With a choke and primer bulb, starting the engine is simple - and when the trimming work is done, the clever split-shaft system allows the 25C-SP to be easily separated in two for convenient transport and storage.

N/A	Ø 2.0mm	40:1	5.0m/s ²	5.6kg

26L-SP SELECT

Art No: MIBC101

Value brushcutter for the domestic gardener

The 26L-SP is a great value trimmer / brushcutter with a nylon cutting head and 3-tooth metal blade. With ergonomic handles, and a reliable simple to start engine, the 26L-SP is easy and comfortable to use. Many features and a choice of cutting attachments make the 26L-SP the perfect choice for those who need a simple, entry level product they can trust.

Accessories Included

SELECT GRASS TRIMMER & BRUSHCUTTER SERIES

AUTO CHOKE SYSTEM

The choke control features set positions for cold and hot starting and automatically returns to idle when the throttle is pulled.

BUMP FEED HEAD

The auto bump feed nylon head supplies more trimmer line when it is required - simply tap the head on the ground when it is spinning to release more line.

PEACE OF MIND

The Mitox® brand offers peace of mind, with its comprehensive 3 year homeowner warranty on SELECT products and a network of over 300 service dealers, all with access to next day spare parts support.

*subject to terms and conditions

RELIABLE ENGINES

High performance, low emission engines, reduce fuel consumption, increase operator comfort and reduce running costs. All compliant to the latest emissions legislation.

ANTI-VIBRATION SYSTEM

All models are fitted with extra anti-vibration measures to reduce vibration transmitted to the users hands and arms, making extended periods of use more comfortable.

ERGONOMIC SOFT GRIP CONTROLS

The soft grip handles are designed for user comfort, even over extended periods of work. The padded inserts further increase comfort and reduce vibration.

25C SELECT

Art No: MIBC80

Quality grass trimmer for the domestic gardener

The 25C is a quality grass trimmer powered by a 25.4cc SELECT engine. With clear starting instructions on the side cover and a user-friendly auto-choke return system, starting the engine couldn't be simpler - and when the trimming work is done, the clever split-shaft system allows the 25C to be easily separated in two for convenient transport and storage. Ideal for light trimming work.

N/A	Ø 2.0 mm	40:1	5.3m/s ²	5.7kg

26L SELECT

Art No: MIBC81

Enhanced brushcutter for the domestic gardener

The 26L is a quality trimmer / brushcutter with a nylon cutting head and heavier duty metal tri-blade. With ergonomic soft grip handles with anti-vibration, easy starting with instructions and auto-choke return, the 26L is both easy and comfortable to use. With quality features and a choice of cutting attachments, the 26L is the perfect choice for the domestic user. Ideal for smaller areas, edging and intricate work around trees.

¹ Equivalent vibration level (ahv, eq)

26U SELECT

Art No: MIBC82

Quality all round brushcutter for domestic gardeners

The 26U is a quality brushcutter with bike handles, nylon cutting head and heavier duty metal tri-blade. With ergonomic, fixed soft grip handles and easy starting system with starting instructions and auto-choke return, the 26U is both easy and comfortable to use. With quality features and a choice of cutting heads, the 26U is the perfect brushcutter for the domestic user. Ideal for clearing open areas and banks.

43U SELECT

Art No: MIBC85

Powerful quality brushcutters for farm / landowners

The 43U is a quality brushcutter with bike handles, nylon cutting head and heavier duty metal tri-blade. The 43U is the most powerful brushcutter in the SELECT range, yet still retains optimal ergonomics and ease of use. With starting instructions, auto-choke return system, and anti-vibration system, the 43U is ideal for those tougher tasks.

PREMIUM BRUSHCUTTER SERIES

AUTO CHOKE SYSTEM

The choke control features set positions for cold and hot starting and automatically returns to idle when the throttle is pulled.

USER COMFORT

The ergonomically shaped handles, with soft grip inserts, provide comfort over extended periods of use, and are fully adjustable to suit the operator's needs. Also, our bike handles feature a position for storage & transport.

PEACE OF MIND

The Mitox® brand offers peace of mind, with its comprehensive 5 year homeowner warranty* on PREMIUM products and a network of over 300 service dealers, all with access to next day spare parts support.

*subject to terms and conditions

EFFORTLESS STARTING

The effortless Soft Start recoil system reduces the force needed to start the engine to a gentle pull - even with just two fingers.

HEAVY DUTY GEARBOX

All models in the PREMIUM range are equipped with heavy duty gearboxes with heat treated gears. This ensures high levels of performance and durability even in the harshest of conditions.

PREMIUM ENGINES

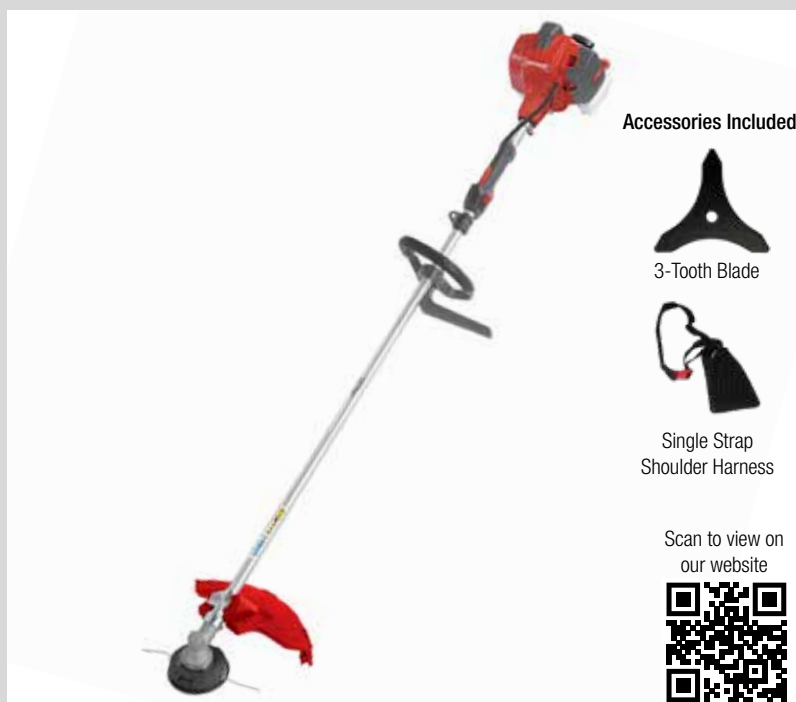

The powerful PREMIUM range engines offer an exceptional power to weight ratio allowing any task to be tackled with ease. Well balanced and versatile, yet with up to 60% more power than the previous generation.

270LX PREMIUM

Art No: MIBC121

Premium, versatile brushcutter for domestic gardeners and landowners

The 270LX is a premium quality straight shaft trimmer / brushcutter and is equipped with a Japanese Walbro carburettor for optimum reliability. At 1.00kW, this is our most powerful model with a loop handle. This extra power makes the 270LX adept at clearing thicker grass and weeds, as well as smaller trimming tasks, where a neat and accurate finish is required.

Accessories Included

MULTI-TOOLS & ATTACHMENTS

The Mitox® multi-tool system offers total versatility in the garden, whether trimming and edging the lawn, cutting hedges or pruning trees, a multi-tool is the cost effective way to achieve it all, requiring the investment of just a single power unit. Our 26 MT-SP model is perfect for homeowners looking for a great value tool for light domestic gardening tasks. For larger and more demanding gardening jobs the attachments of the 28MT offer advanced features for improved durability.

26MT-SP

Light homeowner use

28MT

Regular use - home/landowner

Multi-Tool Overview	24
----------------------------	-----------

SP SELECT Series	26
-------------------------	-----------

The Mitox[®] SELECT 'SP' model offers simple, durable, value for money components for homeowner use.

SELECT Series	27
----------------------	-----------

The Mitox[®] SELECT Series offers advanced features such as a fully adjustable 7 position pole pruner attachment, which makes pruning safer and easier.

Specification Chart	28
----------------------------	-----------

MULTI-TOOL & ATTACHMENT SERIES

ONE TOOL MULTIPLE OPTIONS

Each multi-tool is supplied complete with a range of attachments, enabling you to complete almost any garden task with ease.

ALUMINIUM COUPLING

Both models feature a split shaft design with a robust aluminium coupling for easy storage and transportation.

REDUCED COSTS

By providing multiple applications from a single power unit, a multi-tool offers significantly lower purchase, running and maintenance costs, when compared to owning individual machines.

RELIABLE ENGINES

The MITOX® engine features a primer bulb and choke for a simple starting procedure. Simply press the primer 7 times, turn the choke on and pull the recoil. Once the engine fires, turn off the choke and pull the recoil again to start the engine.

EASY STORAGE

The power unit and each of the attachments can be split and stored or transported individually, saving space in your car, shed or garage.

ERGONOMIC CONTROLS

The handles are designed for comfort, even over extended working periods. The solid triggers reduce the risk of damage, ensuring a long working life.

Grass Trimmer / Brushcutter Attachments

The attachments include a bump feed twin cord nylon cutter head for trimming grass and light material with ease. The heavy duty 3 tooth tri-blade is designed for use in heavier growth and brush.

Pruner Attachments

The pruner attachments are extended chainsaws with a 10" cutter bar and chain. Perfect for pruning tree branches and with the addition of the extension shaft (excludes SP), even the highest branches are within reach. The 28MT includes our ADVANCED pruner attachment which features an innovative adjustable 7 position articulation, to make pruning even safer and easier.

Hedge Trimmer Attachments

The hedge trimmer attachments offer versatility when trimming and cutting hedges of all shapes and sizes. Both models feature blade articulation, which enables the cutting of low hedges and hedge sides, while the added reach allows for the easy maintenance of higher hedge tops, without the need for a ladder.

Extension Shaft

The extension shaft is recommended for use with the powered pruner and hedge trimmer attachment and adds an additional 1 metre of reach, making even the highest branches safe and easy to maintain, (excludes SP).

26MT-SP SELECT

Art No: MIMT30

Ideal for every garden task

With hedge trimmer, powered pruner, grass trimmer and brushcutter attachments, the 26MT-SP is ideal for almost any garden task. As with all Mitox® machines, the Mitox® 26MT-SP is designed for durability over extended periods, with heavy duty aluminium components, a 26mm thick drive tube and an 8mm solid steel drive shaft. The 26MT-SP offers a simple to use, low cost option for maintaining your garden.

28MT SELECT

Art No: MIMT31

Enhanced features for user comfort

The Mitox® 28MT offers a step up in quality and functionality from the 26MT-SP. With an enhanced anti-vibration throttle control for more comfortable use over longer periods of time, and a quality Mitox® SELECT powerful engine, the 28MT makes more challenging tasks possible. The higher specification of attachments provide greater efficiency whilst the 1 metre extension shaft allows for working at increased heights.

HEDGE TRIMMERS

All Mitox® hedge trimmers are built to withstand tough challenges, with high-quality blades and powerful long life engines. Mitox® hedge trimmers make working in the garden easy, whether it be light trimming, or the heavier cutting of overgrown hedges. Our products are simple and intuitive to use with a host of user friendly features to make the task easier and more enjoyable. Whenever extra length is needed for taller, or deeper hedges, Mitox® long reach hedge trimmers provide the solution, making this work both easier and safer.

SELECT Long Reach Series 32-33

The Mitox[®] SELECT Series offers durable, value for money long reach hedge trimmers for homeowner use. (Includes SP)

PREMIUM Hand Held Series 34-37

The Mitox[®] PREMIUM Series offers a range of hedge trimmers with advanced features, for heavy duty homeowner, farm or landowner use.

Specification Chart 38

SELECT HEDGE TRIMMER SERIES

EASY STARTING

Easy starting thanks to the effortless recoil system, with easy to follow starting instructions clearly laid out on the side cover of the engine.

ARTICULATING BLADES

The blades on the 26LH-SP articulate through 150 degrees for trimming the tops and sides of hedges, whilst the 28LH blades can articulate through 180 degrees for greater versatility.

RELIABLE ENGINES

High performance, low emission engines, reduce fuel consumption, increase operator comfort and reduced running costs. All compliant to the latest emissions legislation.

PADDED FRONT HANDLE

The front handle enables multiple grip positions for work at various angles and heights, whilst reducing vibration and making operation more comfortable.

EASY TRANSPORT & STORAGE

The 26LH-SP and 28LH feature a split shaft design, with a robust aluminium coupling allowing for easy transport and storage of the product.

ERGONOMIC CONTROLS

The throttle controls on the MITOX® long reach hedge trimmer range are ergonomically designed for user comfort, as well as being designed to stand the test of time.

26LH-SP SELECT

Art No: MIHT50

Trim tall hedges safely and quickly

The 26LH-SP enables safe trimming of tall hedges without using a ladder, with an effective reach of over 12ft. The 440mm dual reciprocating blades can be articulated to any position through 150 degrees, leaving the perfect finish on high, low and sides of hedges. The 25.4cc full crank engine offers an optimal power to weight ratio for easy handling.

440mm / 390mm	2280mm	40:1	5.0m/s ²	6.8kg

28LH SELECT

Art No: MIHT55

Extra flexibility for cutting at height

The 28LH utilises the latest 25.4cc Mitox[®] SELECT engine and is enhanced by a 580mm dual reciprocating hedge cutter blade assembly. Offering greater flexibility, for more demanding work, the 28LH blades benefit from a greater range of articulation, via an advanced adjustment design for ease of use. The padded rubber front handle provides a comfortable grip and reduces vibration. The split shaft design enables easy storage and transport.

PREMIUM HEDGE TRIMMER

EASY STARTING

All Mitox® hedge trimmers are fitted with a primer bulb and manual choke for quick and easy starting every time.

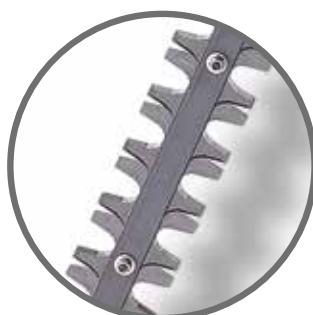

ErgoTwist REAR HANDLE

The rear handle is adjustable through 180 degrees (3 position), offering optimum user comfort in any situation.

LIGHTWEIGHT FOR COMFORT

The use of lightweight, high quality materials, such as magnesium and aluminium in the engine and transmission, results in an optimal power to weight ratio.

PREMIUM BLADES

Specially designed, hardened, dual reciprocating diamond ground blades offer maximum cutting performance and efficiency, time and time again.

SmartPull RECOIL ASSIST

The unique design of the 'SmartPull' recoil, ensures easier pulling and quicker starting. With 'SmartPull' recoil assist, the engine is up to 30% easier to start.

PEACE OF MIND

The Mitox® brand offers peace of mind, with its comprehensive 5 year homeowner warranty on PREMIUM products and a network of over 300 service dealers, all with access to next day spare parts support.

650DX PREMIUM+

Art No: MIHT15

Optimal performance with low weight and perfect ergonomics

The 650DX+ is a premium quality double sided hedge trimmer, powered by an easy-starting 22.2cc engine fitted with a Walbro Japan carburettor. The professional quality, 4-point anti-vibration system effectively isolates the handles from the engine. The ErgoTwist rear handle is quickly adjusted for optimal operator comfort during use. The blade protectors make working safer and protect the blade tip from damage.

Powered Pruner	48
-----------------------	-----------

PREMIUM CHAINSAW SERIES

MORE POWER

The Premium series features a higher power output comparable to significantly higher priced premium brands.

EASY STARTING

385CSX and 415CSX platforms feature a single spring damper system for comfortable starting. The large platform 455CSX and 515CSX feature a durable SmartPull twin spring assist system, reducing effort by approx 30%.

INTEGRATED TOOLS

The extra wide rear handle base not only protects users hands but also houses an integrated tool with spark plug and chain cover wrench.

EASY ACCESS

The premium quality air filter prevents dust from entering the engine and is easily removed without tools, for routine servicing. The larger chamber increases airflow, for guaranteed performance.

FUEL WINDOW

The rear mounted fuel tank features an integrated window so you can clearly see the fuel level in use, meaning you shouldn't ever run out of fuel.

PEACE OF MIND

The Mitox® brand offers peace of mind, with its comprehensive 5 year homeowner warranty on PREMIUM products and a network of over 300 service dealers, all with access to next day spare parts support.

385CSX PREMIUM

Art No: MICS52

A new level of power for homeowner chainsaws

The 385CSX adds a new dimension of power to our most compact size of chainsaw. With over 30% more power from the 38.5cc engine than comparable models. The 385CSX is effortless in operation, thanks to the vibration-limiting, comfortable front handle and soft-grip rear handle, making it a joy to use. Starting is also aided by the recoil assist, which reduces resistance in the starter cord, firing the engine into life with just a gentle pull.

Scan to view on our website

415CSX PREMIUM

Art No: MICS56

Premium quality and performance from a compact saw

For those looking for a compact, lightweight chainsaw, with a bigger cutting capacity, look no further than the 415CSX. Packed with features, including new ergonomic handles, the effort reducing recoil system, quality Champion brand spark plug and professional grade crankshaft, the 415CSX is our best-performing compact sized chainsaw. Perfect for the demanding user looking for a high quality and value for money chainsaw, for cutting more than just firewood.

Scan to view on our website

455CSX PREMIUM

Art No: MICS58

Powerful and robust for demanding use

The 455CSX packs a powerful 45cc engine, with 18" Oregon guide bar, ensuring maximum power and performance - when working with tough knotty wood, where a longer guide bar would start to struggle, the 455CSX keeps on cutting. The magnesium alloy crankcase, combined with the 18" guide bar, saves weight and improves balance, making the 455CSX easy to operate in the harshest conditions.

Scan to view on our website

515CSX PREMIUM

Art No: MICS60

Extra power when it matters

Sharing the same magnesium alloy crankcase and packed into the same compact frame as the 455CSX, the 515CSX offers a longer 20" Oregon guide bar and even more powerful 50.9cc engine. Despite its power, the 515CSX is surprisingly easy to handle, thanks to its optimised balance, weight-saving features and ergonomic soft-grip handles. Perfect for homeowners, landowners and farmers looking for a reliable powerful saw.

CS260TX PREMIUM

Art No: MICS41

Lightweight yet powerful for advanced operators

The CS260TX is a compact, lightweight, top handled chainsaw, which should only be used by trained, competent operators. Its low weight and compact dimensions make it an ideal pruning saw. The toolless access air filter makes on-the-go maintenance easy, whilst the powerful 25.4cc engine, with a Walbro Japan carburettor and 10" Oregon guide bar and saw chain, ensure high performance.

SELECT POLE PRUNER SERIES

3.10 metres (with extension shaft)

SELECT POLE PRUNER

ADVANCED PRUNER HEAD

The 254mm / 10" pruning chainsaw is fitted with proven quality Oregon chain, for optimal cutting performance. It also has an innovative articulated 7 position design for easy use.

AUTOMATIC OILING

The automatic chain lubrication system provides the right amount of oil for the cutting task, whether hard or softwood.

PADDED FRONT HANDLE

The front handle allows for multiple grip positions for work at various angles and heights, whilst reducing vibration and making operation more comfortable.

EASY STARTING

Easy starting thanks to a fuel primer bulb and manual choke. Simply prime and set the choke to closed, then use the recoil starter to fire the powerful 2-stroke engine into life.

SAFETY FIRST

The long, light weight aluminium shaft, gives the user approximately 5 metres of reach, enabling tall trees to be pruned without the use of a ladder. The 28PP also includes a 1 metre extension for the tallest branches.

PEACE OF MIND

The Mitox® brand offers peace of mind, with its comprehensive 3 year homeowner warranty on SELECT products and a network of over 300 service dealers, all with access to next day spare parts support.

*subject to terms and conditions

28PP SELECT

Art No: MIPP01

Keep tall trees in shape

The Mitox® 28PP is the perfect tool for those tough tree pruning jobs where a chainsaw just won't safely reach. Powered by a 25.4cc full crank, 2-stroke engine and featuring a quality 10" pruning chainsaw, with automatic chain lubrication, the 28PP makes light work of tough pruning jobs. Thanks to its long reach, which enables you to trim branches up to approximately 5m (16ft) in height, there's no need to use ladders to keep trees in shape.

The 28PP also features the ADVANCED pruning head which has a unique articulated head for even easier cutting of high branches.

WOOD SPLITTERS

All Mitox® wood splitters are designed to make splitting logs both easier, quicker and safer than traditional methods. Whether splitting a small amount of wood in a shed or garage, or a large quantity out on-site, the Mitox® range has a suitable wood splitter for your needs.

41 LSH

66 LSH

801 LSV

Light homeowner use

Regular use - home/landowner

Horizontal Series 52

The Mitox® Horizontal wood splitter range offers a simple to use and compact product for homeowner use. Making splitting logs simple and safer when compared to traditional splitting with an axe and more cost effective than using bought in pre-split logs. Our unique Quicksplit feature allows the splitting ram to be adjusted, so shorter logs are split even quicker.

Vertical Series 54

The Mitox® Vertical wood splitter is suitable for heavy duty use by homeowners and landowners/farmers where large quantities of logs need to be processed, due to the powerful electric motor.

Specification Chart 56

SELECT HORIZONTAL WOOD SPLITTERS

WELL BALANCED

The wide log cradle allows you to easily place logs to be split, holding them in place on the splitting beam. Safety is increased as the operator does not need to hold the log in place as it is split.

TWO HANDED OPERATION

The two handed operation with handguard prevents the possibility of the operator's hands being pinched by the splitter. As soon as the switch is released, the pushblock returns to its start position.

SAFETY CAGE

Mitox® horizontal log splitters are supplied with a safety cage which can be fitted to the log splitter to ensure that the wood splitting area remains isolated and to prevent the log leaving the machine and causing a potential injury during the splitting process.

EASY TRANSPORT

The large transport wheels enable the splitters to be effortlessly moved. Work is more efficient when the splitter is moved closer to the woodpile, saving time and effort when splitting larger quantities of wood.

QUICKSPLIT FUNCTION

When working with shorter logs, Quicksplit saves time by allowing adjustment of the splitting wedge start position, for a faster stroke.

PEACE OF MIND

The Mitox® brand offers peace of mind, with its comprehensive 3 year homeowner warranty on SELECT products and a network of over 300 service dealers, all with access to next day spare parts support.

*subject to terms and conditions

41LSH SELECT

Art No: MILS20

Compact and powerful homeowner wood splitter

The 41LSH is the smallest model in the wood splitter range but still possesses sufficient power for most domestic wood splitting tasks. The 1500W electric motor provides up to 4 tonnes of splitting force whilst the frame allows logs up to 37cm and 25cm wide to be split in seconds with minimal effort - simply depress the two control switches and the reinforced pushblock drives the log into the fixed splitting wedge, slicing it neatly in two.

Scan to view on
our website

Type	Motor	Power Output	Maximum Splitting Force	Splitting Length
Horizontal	230v Electric	1500W	4 tonne	370mm
Cable Length	Stand Included	Dimensions (L x W x H)	Quicksplit	Dry Weight
5 metre	No	100 x 42.5 x 61cm	Yes	44kg

66LSH SELECT

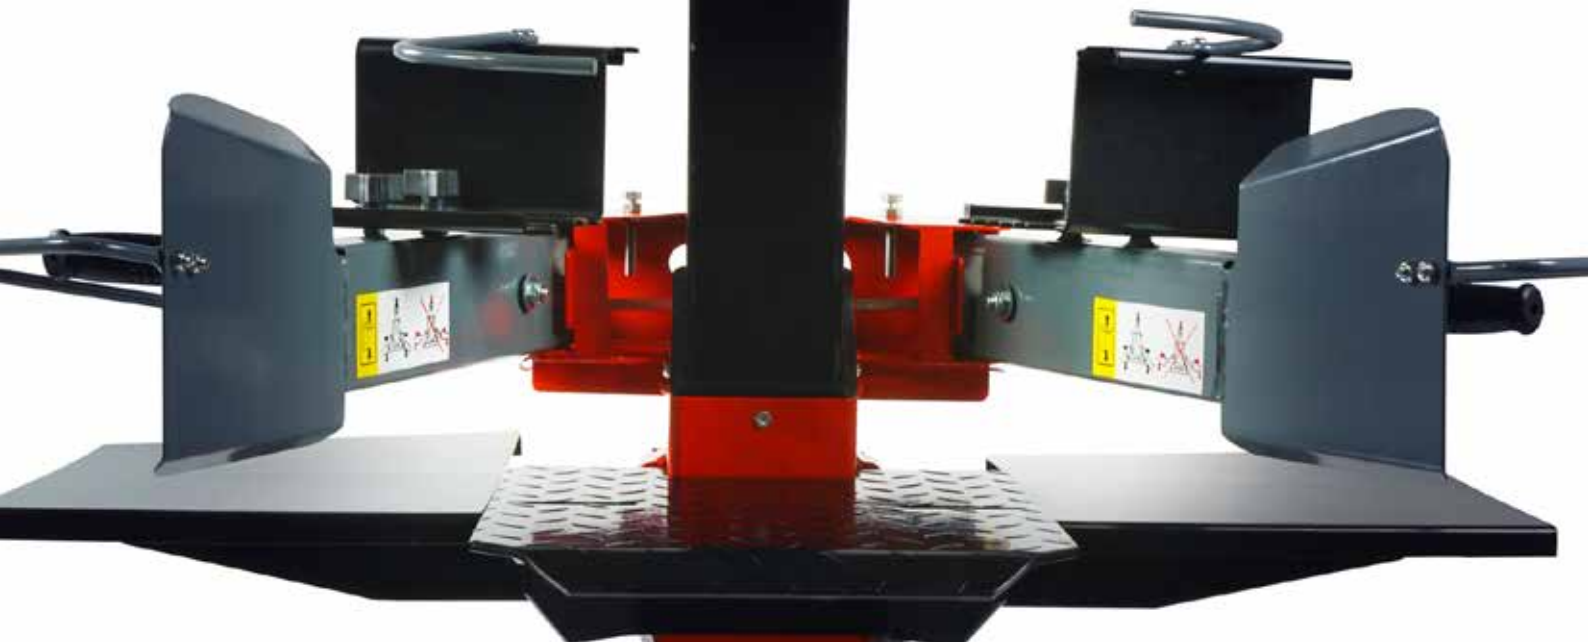

Art No: MILS23

Increased power and splitting capabilities for more demanding jobs

The 66LSH is equipped with a more powerful 2200W motor, providing up to 6.5 tonnes of reliable splitting power and is capable of splitting logs up to 52cm in length. The 66LSH is supplied with a stable stand which can be used to elevate the splitter to a more comfortable working height.

Scan to view on
our website

Type	Motor	Power Output	Maximum Splitting Force	Splitting Length
Horizontal	230v Electric	2200W	6.5 tonne	520mm
Cable Length	Stand Included	Dimensions (L x W x H)	Quicksplit	Dry Weight
5 metre	Yes	116 x 72 x 135cm (inc stand)	Yes	64kg

SELECT VERTICAL WOOD SPLITTER

POWERFUL ELECTRIC MOTOR

With a powerful 3000w electric motor, the Mitox® 801LSV generates up to 8 tonnes of splitting force - more than enough for the most demanding splitting task.

QUICKSPLIT FUNCTION

When working with shorter logs, Quicksplit saves time by allowing adjustment of the splitting wedge start position, for a faster stroke.

TWO HANDED OPERATION

The two handed operation, with handguards, prevents the possibility of the operator's hands being pinched. When the handles are released, the splitter returns to its start position.

EASY TRANSPORT

The large, easy to grip handles and easy-rolling transport wheels, make Mitox® vertical wood splitters mobile with the minimum of effort. The 5 metre cable gives extra freedom.

ADJUSTABLE FOR FLEXIBILITY

The wood grip ensures that the log is held in the correct position during the splitting process. These grips can easily be adjusted making it possible to split wood up to 30cm in diameter.

PEACE OF MIND

The Mitox® brand offers peace of mind, with its comprehensive 3 year homeowner warranty on SELECT products and a network of over 300 service dealers, all with access to next day spare parts support.

801LSV SELECT

Art No: MILS26

For the toughest splitting tasks using electrical power

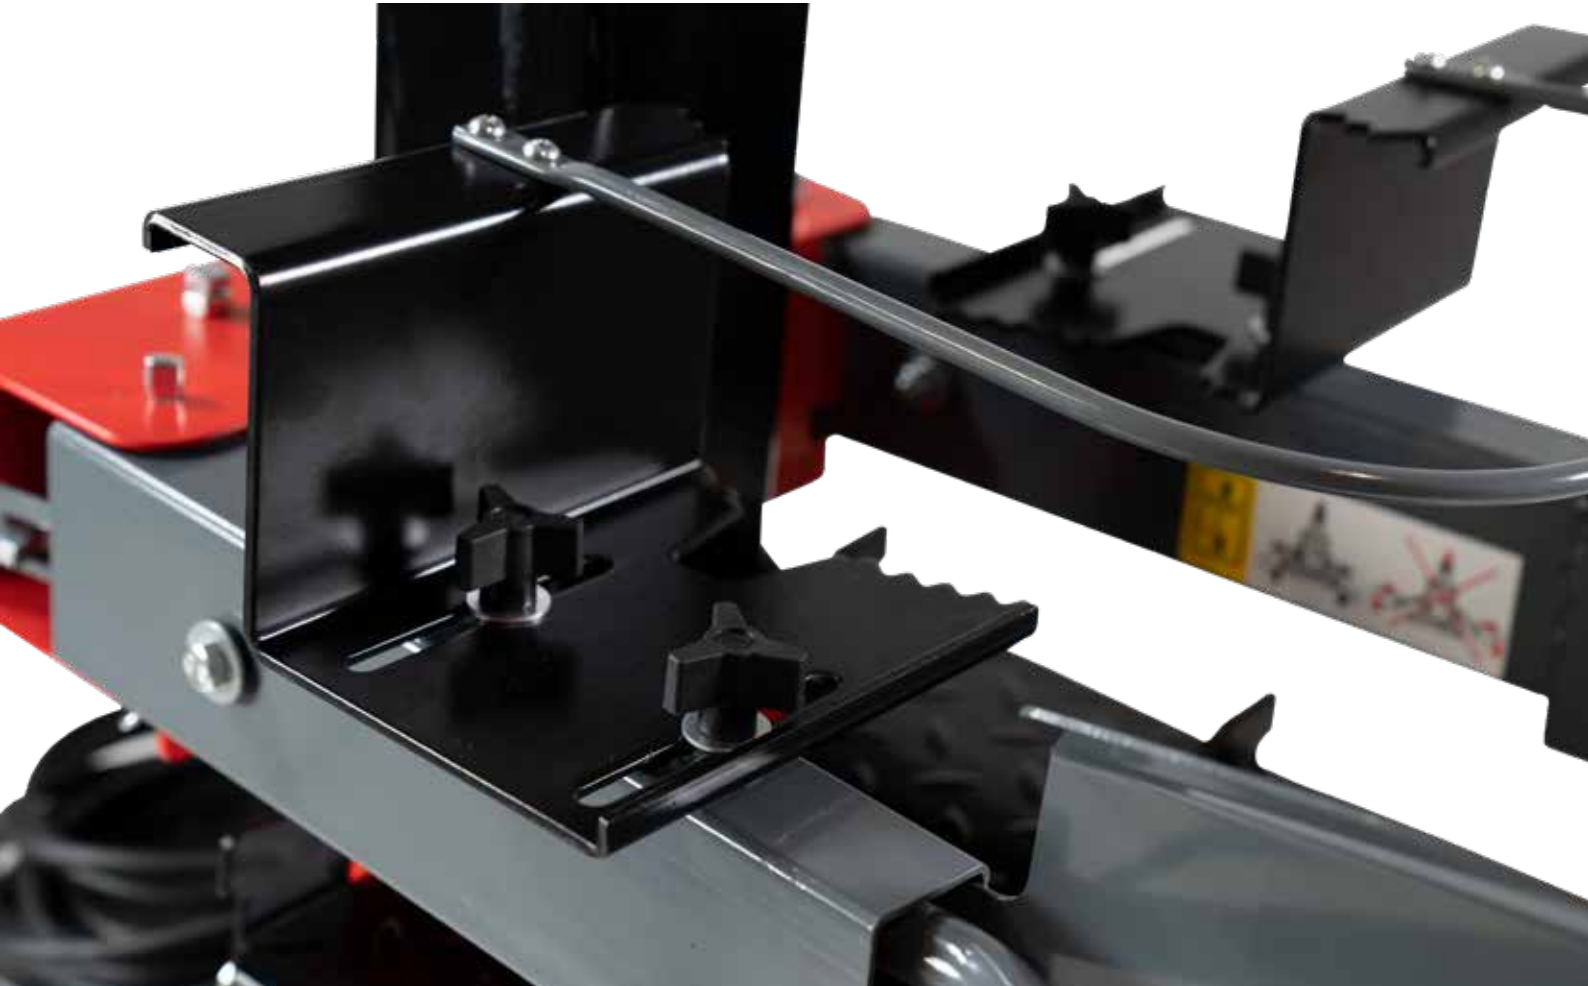

The 801LSV vertical log splitter is designed to cope with the most demanding workloads in the garden or estate. The 3000W electric motor delivers 8 tonnes of splitting force for efficient wood splitting of logs up to 55cm in length and 30cm wide. The side mounted tables, log retainers and two hand operation ensure safe operation whilst the large transport wheels allow the log splitter to be manoeuvred to and from the working area.

MITOX[®]

BLOWERS / VACUUMS

Mitox® blowers and vacuums are perfect for blowing and collecting fallen leaves, grass clippings and general garden debris and with the added function of our vacuum shredder feature, you can collect a pile of waste and shred it down to a fine mulch, which is perfect for fertilising the garden.

26B-SP
28BV-SP

Light homeowner use

260BX
280BVX

Regular use - home/landowner

760BPX

SP Handheld Series 60

The Mitox® SP handheld range offers both blowers and blower vacuums with exceptional value for money.

PREMIUM Handheld Series 62

The Mitox® PREMIUM handheld range offers both blowers and blower vacuums with advanced features and high performance.

PREMIUM Backpack Series 64

The Mitox® PREMIUM backpack blower offers high power for clearing large areas quickly.

Specification Chart 66

SP SELECT BLOWER / VAC SERIES

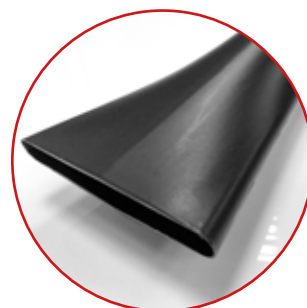

COLLECTION BAG

The 50 litre collection bag on the 28BV-SP is filled to the brim and is easily emptied via the zipped opening.

EASY STARTING

Easy starting thanks to a fuel primer bulb and choke. Simply prime and set the choke to closed, then use the recoil starter to fire the powerful 2-stroke engine into life.

HIGH BLOW SPEED

The specially designed blowing tube offers high airspeed to quickly move even stubborn, damp leaves.

SIMPLE OPERATION

The SP blower and blower vacuum have simple controls for ease of use, allowing the user to cover areas quickly and in comfort. The price/performance ratio of the SP models offers unbeatable value for money.

METAL SHREDDER

The metal blade of the vacuum impellor, on the 28BV-SP, shreds leaves as they are collected, reducing their volume by approximately 10:1

FULL CRANK ENGINES

Providing superior performance, lower vibration, and considerably longer service life when compared to Half Crank (single bearing) engines, commonly used on low cost domestic garden machinery.

26B-SP SELECT

Art No: MIBV01

A great value leaf blower

The 26B-SP leaf blower is powered by a 25.4cc petrol engine which generates a high blowing speed for efficient leaf clearing. The throttle control function enables comfortable operation for periods of prolonged use. Included with the blower is a flat blower tube, making it ideal for clearing leaves in small focused areas. The blower is also suitable for clearing grass trimmings, light hedge cuttings, sawdust, dirt and debris off garden pathways making it an ideal tool to use all year round.

28BV-SP SELECT

Art No: MIBV05

A great value leaf blower and vacuum

The 28BV-SP leaf blower/vacuum is powered by a 25.4cc petrol engine, which generates a high blowing speed for efficient leaf clearing and collection. The cruise control function enables comfortable operation for periods of prolonged use, whilst the vacuuming function allows quick and thorough clearing thanks to the 50L collection bag and a 10:1 reduction ratio, ensuring maximum efficiency.

155mph	50L	10:1	No	6.2 kg

PREMIUM BLOWER / VAC SERIES

COLLECTION BAG

The 50 litre collection bag on the 280BVX is filled to the brim and is easily emptied via the zipped opening. With different material on each side, maximum collection ability is guaranteed, whilst the user is protected from wet mulch.

CRUISE CONTROL

Easy starting thanks to a fuel primer bulb and choke. Simply prime and set the choke to closed, then use the recoil starter to fire the powerful 2-stroke engine into life.

LOW VIBRATION

The Premium range engine is completely isolated from the handle via a full anti vibration system, which means exceptionally low vibration and comfortable use.

PERFECTLY BALANCED

The design of the engine position and an innovative kinked blower tube, mean that all gyro forces are effectively cancelled out. This means that if the machine is on, or off the throttle, it never pulls to one side.

METAL SHREDDER

The metal tri-blade of the vacuum impellor shreds leaves as they are collected, reducing their volume by 12:1.

PEACE OF MIND

The Mitox® brand offers peace of mind, with its comprehensive 5 year homeowner warranty on PREMIUM products and a network of over 300 service dealers, all with access to next day spare parts support.

260BX PREMIUM

Art No: MIBV15

Quick garden and estate tidying

The 260BX blower benefits from a premium, lightweight design and powerful 27.6cc engine. The blower includes 2 different attachments, offering powerful focused airflow, or a wider spread, for more general work. Thanks to the engine being isolated from the handle, the 260BX features an exceptionally low vibration reading and combined with the kinked blower tube, enables extended comfortable use over longer periods of time.

0.40 litres	40:1	2.0 m/s ²	4.8kg

280BVX PREMIUM

Art No: MIBV10

Blow and Vacuum for complete garden tidying

The 280BVX benefits from a premium lightweight design and powerful 27.6cc engine and has the added benefit of a vacuum function. Once the blower has been used to concentrate the leaves into one place, simply attach the vacuum tube and collection bag, to switch to vacuum mode. Thanks to the engine being isolated from the handle, the 280BVX features an exceptionally low vibration reading, for extended comfortable use over longer periods of time.

PREMIUM BACKPACK BLOWER SERIES

POWER & PERFORMANCE

The 75.6cc Premium engine provides impressive power and when combined with the efficient fan design, it is possible to generate air speeds of over 200mph. This means that even the largest areas can be covered quickly and efficiently.

CRUISE CONTROL

The throttle control features a cruise control trigger, which allows the user to preset the throttle for periods of longer use, reducing fatigue. The handle is also fully adjustable.

CLEAN AIR INTAKE SYSTEM

The commercial grade air filter prevents dust from entering the engine and is easily removed without the need for tools, allowing routine servicing.

RUNS LONGER THAN EVER

The large 2.1L fuel tank means the 760BPX can be used for longer periods of time before refilling. Perfect for large areas where efficiency is important.

COMFORT GUARANTEED

The 760BPX features a full body harness system, with padded shoulder straps and back support, as well as an innovative blower tube harness, to take the weight during use.

PEACE OF MIND

The Mitox® brand offers peace of mind, with its comprehensive 5 year homeowner warranty on PREMIUM products and a network of over 300 service dealers, all with access to next day spare parts support.

*subject to terms and conditions

760BPX PREMIUM

Art No: MIBP10

Cover large areas quickly and efficiently

The Mitox® 760BPX petrol leaf blower is our most powerful leaf blower in the range. Designed for the toughest tasks, for farmers, estates, landowners and contractors, its large air flow and high air speed are provided by an efficient fan design, together with a powerful 75.6cc PREMIUM series engine. Featuring fully adjustable hand controls, cruise control, wide padded harness straps for user comfort and low vibration levels, the 760BPX also allows for use in the commercial environment.

DID YOU KNOW **80%** OF ENGINE PROBLEMS ARE RELATED TO BAD FUEL?

Mitox® recommends the use of B3C fuel solutions to protect your engine from the harmful effects of ethanol in modern fuel. B3C allows you to TEST your fuel, FIX poor running engines and PREVENT issues from reoccurring.

WHY DO I NEED TO PROTECT MY ENGINE FROM FUEL?

Currently in the UK, petrol can contain between 5 - 10% ethanol. High amounts of oxygen in ethanol blended fuels cause the petrol to decay faster. Petrol powered equipment, not treated with an ethanol fuel stabiliser, will become hard to start within 30 days and the petrol begins to decay in as little as 60 days. (Note: This process begins from blending at the refinery, prior to you purchasing the fuel from the forecourt.)

The ethanol in the fuel attracts water, (present in the air, in your fuel tank and storage can, etc). They bond to form a highly corrosive mixture, which can have devastating effects on your engine.

We recommend the use of Ethanol Shield fuel stabiliser, which should be added to petrol as soon as it is purchased. It is highly concentrated, so only requires 8ml (approximately 2 capfuls) per 5ltrs of petrol. Mixed fuel in the engine and storage containers can then be stored for up to 12 months.

For the ultimate protection for your machine, we also recommend adding a Gas Tank Shield to your fuel storage container and/or tractor's fuel tank. This molecular sieve attracts and absorbs water in the fuel and helps to prevent fuel decay.

After any machine has been stored for a prolonged period of time (over the Winter for example), we recommend the use of Mechanic In A Bottle. This product will help ensure your machinery starts easily and runs smoothly.

For more information on how modern day fuels can affect your machinery and how the fabulous range of products from B3C can protect, optimise performance and increase the life of your machinery, please go to: www.b3cfuel.co.uk

Scan to view the
B3C website

TEST

Petrol Test Swabs

Application: A simple swab test that takes just a few minutes, to give an indication as to the condition of fuel, be it Fresh, Marginal, or Bad.

FIX

Mechanic In A Bottle

Application: Suitable for both 2 & 4-stroke engines. It is designed to combat fuel related issues on poor or non-running engines, by revitalising stale fuel, removing water, cleaning carbs and injectors, etc, without the need to disassemble the machine. It is also recommended to be run in machinery, during its first use after being stored for an extended period. (Use poor running dosage). Note: Doesn't fix broken!

PREVENT

Ethanol Shield

Application: Prevent future engine problems with Ethanol Shield. This year round fuel stabiliser is suitable for power equipment with either 2 or 4-stroke engines. The preventative maintenance formula eliminates then prevents ethanol related problems. It removes water, prevents corrosion, reduces engine temperatures, provides easy engine starting all year, keeps stored fuel fresh and extends engine life. Note: This is not a replacement for 2-stroke oil!
