

# HRS 536 SK

## 21" Side-discharge Self-propelled Lawnmower

### Self-propelled

The engine drives the mower forward, taking the effort out of lawncare.

### Easy recoil start

Automatic decompressor considerably reduces the pull force required, for easy starting every time.

### 160cc OHC 4-stroke engine

GCV160 engine gives smooth, quiet performance with renowned durability.

### Side-discharge with mulching option

For faster work over large areas of grass, with no grass bag to empty. With the side-discharge cover closed, clippings are re-cut inside the deck and blown back into the lawn. These quickly break down to give a valuable nutrient boost for a lush green lawn.

### Auto choke

Easy starting, whether the engine is warm or cold.

### Large diameter wheels

With smooth running cartridge bearings and rubberised tread give superior traction and a smoother ride.

### 6 cutting heights

Ranging from 24–87mm, giving you the perfect choice of cut for the condition of your lawn.

The HRS 536 SK is ideal for mowing less critical areas around the garden quickly, saving you the time and effort of emptying the grass bag. Simply closing the cover on the deck also gives you the option to mulch the clippings – finely re-cutting them within the deck to quickly return their nutrients to the lawn, for a natural and eco-friendly nitrogen boost.

The HRS features a light yet durable steel deck, smooth and quiet Honda 4-stroke engine and simple controls for quick and easy work.
